The Range Road RR602 ATV/UTV Log Trailer is designed to transport logs and lumber. This trailer boasts a robust frame with a tandem walking beam axle system. It also includes a safety cage to prevent logs from sliding into the back of your ATV/UTV or tractor, while the four removable log support posts provide added height for your loads. The trailer also features 2 front outriggers for added stability while loading/unloading. The trailer's length is adjustable, making it safe to haul lumber or logs up to 12' long.

### Heavy Duty Construction

The frame and chassis of this trailer are made of 4mm thick square tubing and are seam welded for maximum durability. The entire chassis is also galvanized and powder-coated to prevent corrosion.

### Designed For Independent Functionality

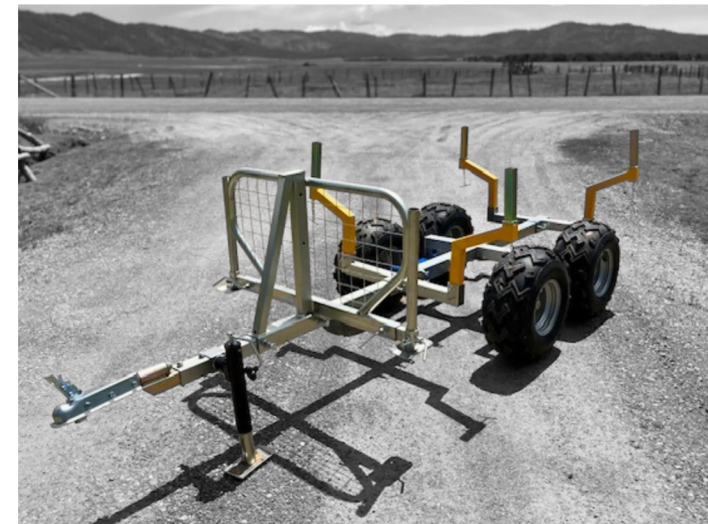

The trailer tongue is fitted with a pivoting ball hitch, allowing for independent movement between the trailer and your machine. Plus, it features a greaseable fitting for easy maintenance.

### Tandem Axle System

The RR602 comes with a heavy-duty, tandem walking beam axle system that is equipped with ATV wheels and tires. This ensures that you can easily navigate your way through virtually any terrain.
